

AN IRONSTONE EXCLUSIVE

We bet you've never laid eyes on this stag handled beauty before. This unique skinning style knife certainly screams for attention, but the real treat is to hold one in your hand. The round stag has a comfortable feel and no two handles are remotely similar. Many are fitted with a curved piece of stag that seems to fit like a glove in any size hand. We're proud to be the first US company to bring you the Hiro Beaver knife. As Hiro fans know from the other Hiro knives we stock, this model provides superior fit and finish from the blade and nickel silver guard to the stag handle and nickel silver pommel. The blade is ground from ATS-34 stainless steel which holds an incredible edge. A handsome double-stitched belt sheath is provided. Available in plain edge only and quantities are limited. A retail value of \$159.95.

GT KNIVES

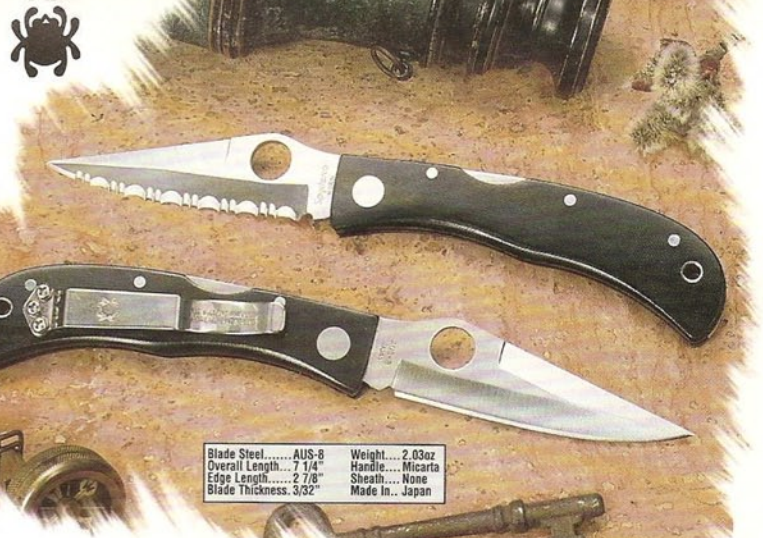

The meticulously crafted GT-One is USA made and sure to satisfy the discriminating knife enthusiast. These unique button-lock folders lock in the open and closed position by way of the push-button brass lock embellished with GT's shield insignia for a classy look. Diamond textured scales are black anodized and machined from 6061-T6 aircraft aluminum for light weight and secured together with three hex screws. The blade is available with either a plain edge or a half serrated edge and can be opened one-handed with the teardrop-shaped recesses and a little practice. Suggested retail \$130.00.

MODEL #GT-BL
YOUR SALE PRICE \$99.95

Blade Steel.....ATS-34 Weight....4.5oz

SPYDERCO'S NEW JESS HORN

Blade Steel.....AUS-8 Weight....2.03oz
Overall Length...7 1/4" Handle...Micarta
Edge Length.....2 7/8" Sheath...None
Blade Thickness: 3/32" Made In.. Japan

This second custom collaboration between Spyderco and the world-renowned Jess Horn once again reflects precise fit and finish combined with attractive styling. After the success of his first Spyderco collaboration, Mr. Horn presented a larger design incorporating the trademark Spyderco thumb-hole opener. Additionally, the black linen micarta scales provide a surprisingly light weight yet durable handle at an affordable price - actually an incredible price considering it's a Horn design! The eye-appealing spearpoint blade is ground from AUS-8 and is available in SpyderEdge or PlainEdge. Suggested retail \$119.95.

MODEL #SP-C34
YOUR PRICE \$95.95

HOTARU (JAPANESE FOR FIREFLY)

With these keychains, you'll never have to worry about leaving home without a knife or a light. The Hotaru's edge length is a full 1 5/8" long, enough to perform a wide variety of everyday cutting chores and the half-serrated blade opens one-handed with a textured thumb-stud. To make this little knife even better, a red LED (Light Emitting Diode) is located at the back of the handle to prevent scratching your car's paint while trying to unlock your door in the dark. A red light is specifically used to prevent the short term night blindness caused by ordinary white light. The bulb and single cell battery are replaceable and the handle is available in yellow or black. A spring-release clip is included on the keyring. Available only with 50/50 combination blade. Suggested retail \$39.95.

SALE ON SNAP-ITs™

When it absolutely, positively has to be there... use a Snap-It. Clipped to a D-ring, belt loop, or life vest, the Snap-It will be there when you need it. This feature proves ideal for the active outdoor enthusiast. This folder incorporates a snap-shackle on the handle instead of Spyderco's pocket clip as a means of attaching the knife to clothing. The snap is released by simply pushing the off-set spring clear of the snap-shackle opening with your thumb. Once the knife is removed, your thumb is in position to open the blade one-handed - no need to rotate the knife in your hand and risk dropping it. An excellent companion for climbing, kayaking, canoeing, fishing, hunting, biking and countless other activities. The thumb-hole for one-hand opening is enlarged in this knife for use with gloves or mittens. Available in SpyderEdge or PlainEdge and with a black or red handle and non-slip black Kraton inlay. Suggested retail \$69.95.

OUTDOOR COOKING KNIFE ON SALE

Tough enough for other stuff, but made for cooking. Get ready for camping season with this Outdoor Cooking Knife from G. Sakai. The 5 1/2" serrated edge is capable of conquering most cutting chores you may encounter in the outdoors, but was made especially for preparing your food. Most camp knives are too cumbersome to cook with, and most kitchen knives don't come with a sheath. This model gives you effortless slicing and dicing as well as the sheath, made of sturdy plastic with a swivel belt-loop to ensure the knife is with you when you need it. AUS-6 stainless steel resists rusting in humid climates. Only available with serrated edge. Suggested retail \$45.95.

ULTIMATE EDGE DIAMOND SHARPENERS

These affordable diamond sharpening steels from Ultimate Edge use microcrystalline diamonds bonded with nickel to a lightweight oval shaped rod. The 600 grit diamond mesh coating works to remove steel so your knife actually gets sharpened rather than just realigned as most "steels" do. The cat's-eye shape enables you to use the corner on serrated knives. The plastic cap on the ends prevents a nick in the blade if you should accidentally catch the top of the sharpener with a forward stroke. No oil or water needed. Four sizes available:

A. COMPANION 5" diamond shaft, 1/2" wide
Suggested retail \$13.50.

MODEL #UE-5N
YOUR PRICE \$11.95

C. GOURMET 10" diamond shaft, 3/4" wide

SPYDERCO CHEFWARE

Whether for use by the professional or the home chef, this kitchen cutlery will perform up to a master chef's highest standards. The 300mm (11 3/4 inch) French Cook's Knife and the small 120mm (4 5/8 inch) Utility/Paring Knife both feature top of the line MBS-26 stainless steel—a higher quality steel than most any other large name chefware. Each blade is individually heat treated, oil quenched, and ice tempered. They are then ground and sharpened by hand. The "out-of-the-box" hair-splitting sharpness of these blades will impress you. Wooden handles are riveted to the full tang for sturdy construction and an elegant look. As with all fine cutlery, it is recommended to hand wash. The Spyderco name assures you of the best performance.

To keep these top-notch knives razor sharp, we offer this exclusive Japanese Waterstone with coarse and fine grit stones laminated together. Many sharpening experts maintain that the finest edge can only be obtained by hand sharpening on a Japanese waterstone. The Japanese swordsmiths are certainly proof of this. They have used the waterstone for years and the extremely consistent grain structure of the stone helps to produce that amazing edge they are famous for. A non-slip rubber base keeps the stone from sliding during sharpening, and water must be used as a lubricant. Stone measures 1 1/8" x 2 5/8" x 8 1/8".

IRONSTONE/SPYDERCO STARTER KIT

If you're thinking of investing in a knife, our kit is an economical way to provide you with a top of the line folder, plus everything you'll need to take care of it. This kit also makes a great gift for someone who has always wanted to own a Spyderco, but is unsure about that famous SpyderEdge! The Tri-Angle Sharpener™ is the ultimate sharpener for serrated edges and makes it easy to obtain professional results. The Pocket Magnifier enables you to examine the cutting edge for dull spots or nicks, as well as to see the progress made while sharpening.

Flitz™ is the best polishing agent on the market and will clean your blade of built up grime such as tape from opening boxes. The Eraserblock provides a quick means of cleaning the steel from the ceramic Tri-Angle stones. And best of all, you can choose from two of Spyderco's most popular pocket knives – the 2 1/2" drop point Delica™ (edge choices of Plain, 50/50 Combination, or SpyderEdge) or the 3 1/2" sheepfoot Rescue™ (SpyderEdge only). Be sure to specify which model you prefer. Suggested retail value \$137.14.

KIT CONTAINS

- 1 Spyderco knife of your choice A. Delica or B. Rescue
- C. 1 Spyderco Tri-Angle Sharpener:
 - 2 medium grit stones
 - 2 fine grit stones
 - 2 brass safety guards
 - 1 ABS plastic base
 - 1 cordura carrying case (fits sharpener only)
 - 1 instruction booklet
- D. 1 .35oz tube of Flitz
- E. 1 Eraserblock
- F. 1 Pocket Magnifier

UNIQUE MOKI KNIFE NECKLACES!

Moki is a rare find in the production knife industry. These factory-custom miniatures they've produced can, and do, double as jewelry. We were so impressed with these little beauties from Moki that we ordered in a good supply for our IRONSTONE customers. Their mirror-polished stainless steel handles are custom-fit with gorgeous natural materials. Yes, they are as functional as they are beautiful. Each razor sharp blade is ground from AUS-6 stainless steel. What an impressive and memorable gift for the person who seems to have everything. Or complement your own wardrobe with one of six different inlays (one for almost every day of the week!). A removable leather sleeve slides over each knife for protection or for a more casual appearance. Please specify which type of inlay you prefer when ordering these IRONSTONE exclusives. A retail value of \$98.95.

SPYDERCO'S FIRST FIXED BLADE!

Although knife enthusiasts consider Spyderco an authority in folders, this fixed-blade design by Bill Moran (founder of the American Bladesmith Society) demonstrates Spyderco's flexibility as a knife company. Designed as the Featherweight, Bill Moran's expertise is clearly evident in this specialized lightweight, yet heavy-duty fixed blade custom design. Weighing in under 3 ounces, this trailing tip hunter makes an excellent skinner or all-around utility knife. The Zytel handle is formed to fit comfortably in the hand, as all Moran camp knives do. To prevent slipping, Kraton is inlaid on both sides of the handle and on top at the thumb rest. This fixed blade is paired with a sturdy leather crossdraw sheath. Blade steel is VG-10, a high carbon stainless with a refined grain structure for long-lasting edge retention. Available in PlainEdge only. Suggested retail \$159.95.

RIGHT NOW IS THE TIME TO HEAT UP YOUR WINTER WITH SOME COLD STEEL® SPECIALS!

BACK BY POPULAR DEMAND

Spyderco's Police Model™ is known worldwide in military and law enforcement circles. Although Spyderco™ discontinued the elite version with the matte black finish, we have arranged to coat **Blak-Ti® Police Models** especially for IRONSTONE customers. Blak-Ti is one of the toughest coatings available today, measuring an astounding 90 on the Rockwell C scale for hardness. The coating also provides resistance to scratches and corrosion. The combination of discreet carry, 3 3/4" of cutting power, and an admired "look" made this knife a top IRONSTONE seller in 1994. Available in the ever popular SpyderEdge™ as well as PlainEdge™. (Left-hand versions can be specially ordered). A retail value of \$189.95.

THANK YOU!

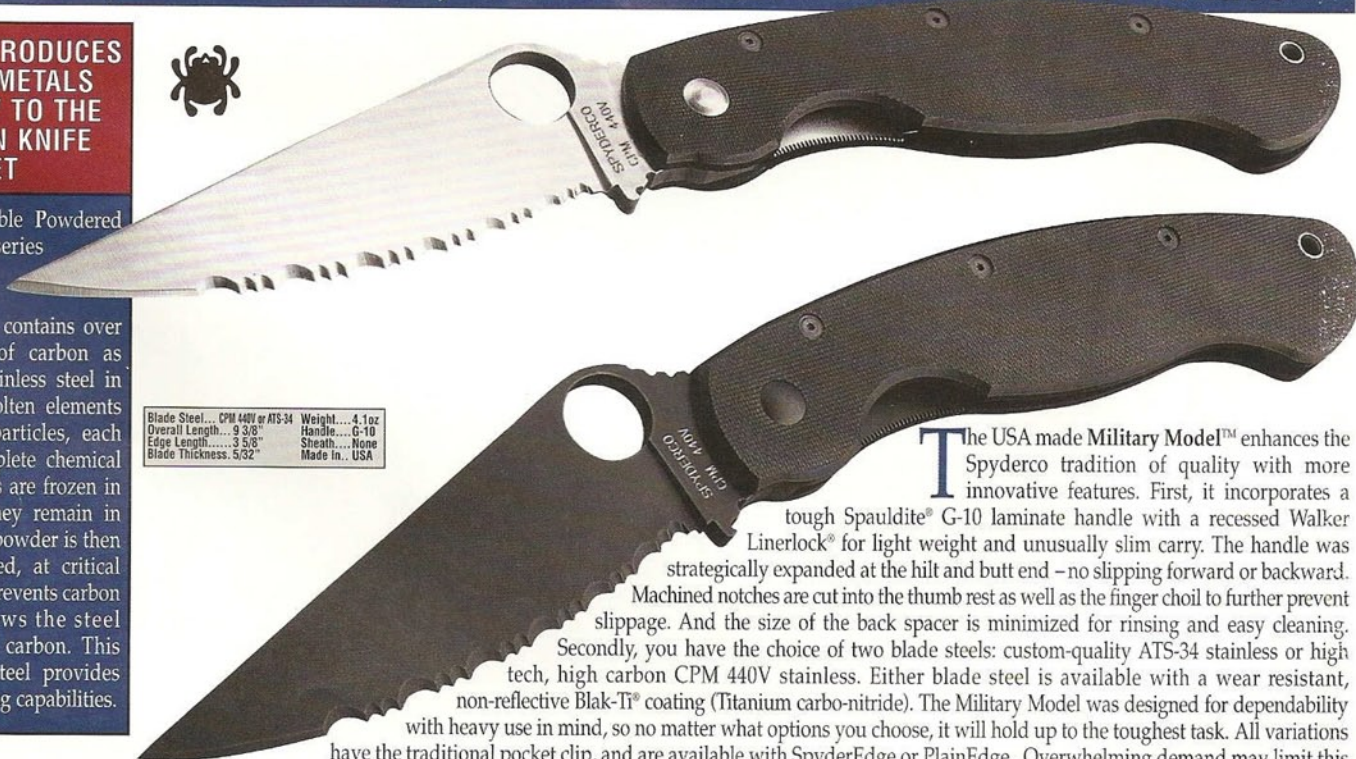

SLIM CARRY, LIGHT WEIGHT, ULTIMATE MATERIALS... FROM SPYDERCO

SPYDERCO INTRODUCES POWDERED METALS TECHNOLOGY TO THE PRODUCTION KNIFE MARKET

CPM 440V is Crucible Powdered Metallurgy in a 440 series stainless, high in Vanadium. This innovative new steel contains over twice the amount of carbon as almost any other stainless steel in the industry. The molten elements are atomized into particles, each containing the complete chemical formula. The particles are frozen in liquid nitrogen so they remain in powdered form. The powder is then fused, but not melted, at critical temperatures which prevents carbon migration and allows the steel to retain its 2+% of carbon. This revolutionary new steel provides incredible edge holding capabilities.

Blade Steel... CPM 440V or ATS-34
Overall Length... 9 3/8"
Edge Length... 3 5/8"
Blade Thickness... 5/32"
Weight... 4.1oz
Handle... G-10
Sheath... None
Made in... USA

The USA made Military Model™ enhances the Spyderco tradition of quality with more innovative features. First, it incorporates a tough Spauldite® G-10 laminate handle with a recessed Walker Linerlock® for light weight and unusually slim carry. The handle was strategically expanded at the hilt and butt end - no slipping forward or backward. Machined notches are cut into the thumb rest as well as the finger choil to further prevent slippage. And the size of the back spacer is minimized for rinsing and easy cleaning. Secondly, you have the choice of two blade steels: custom-quality ATS-34 stainless or high tech, high carbon CPM 440V stainless. Either blade steel is available with a wear resistant, non-reflective Blak-Ti® coating (Titanium carbo-nitride). The Military Model was designed for dependability with heavy use in mind, so no matter what options you choose, it will hold up to the toughest task. All variations have the traditional pocket clip, and are available with SpyderEdge or PlainEdge. Overwhelming demand may limit this first production run, but we will be happy to put you on a back order listing. (first ordered, first shipped).
