# CLIPIT FOLDING KNIVES

## PRODUCED BY SPYDERCO, INC.

---

The Clipit Folding knife is truly the beginning of the next generation of folding knives. From the patented design through materials and construction, you will have assured quality. No matter how many knives you own, the Clipit is the one you will carry, use and tell your friends about.

Our range of sizes, models and prices will satisfy your individual needs. (Left hand versions are available in some models.)

Like all Spyderco products, there is no compromise in quality. Our philosophy is to provide "Simplicity, Performance and Longevity."

Value is apparent in every facet: G-2 high-carbon, chrome-moly stainless steel is proving to be one of the best edge holders on the market today. Even our standard model utilizes 6-A stainless. All parts are stainless steel: scales, pins, lock, screws spring and clip. From the tiny "LadyBug" to the "Police Model," each Clipit provides a fistful of value uncommon in today's marketplace.

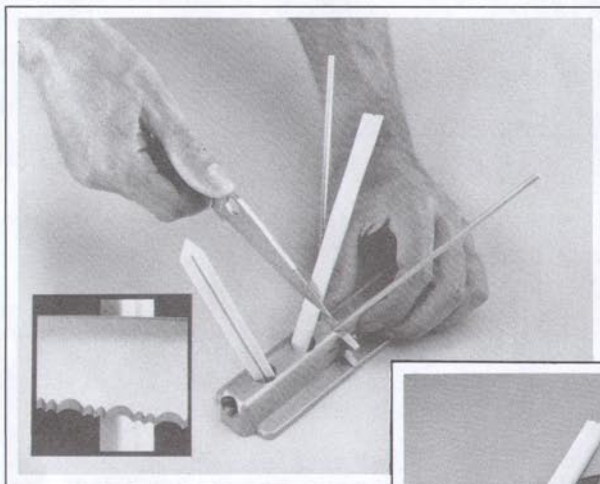

Clipits are designed and produced with performance as our prime objective.

**PlainEdge** versions have a conventional edge found on most knives.

**SpyderEdge** versions provide exceptional cutting power and uncommon edge retention. This edge is perfect for difficult cutting chores such as rope, cardboard and seat-belts. The SpyderEdge version is our most popular seller.

**Sharpening** *conventional* types of edges can be accomplished with most conventional methods. *SpyderEdges* require a radius that will fit in the smallest serration. Below are two ceramic models we offer. Both sharpeners have illustrated instructions provided.

Model No. 203MF

Model 701MF

U.S. Patents 4,231,194, 4,347,665 and 4,776,094

Foreign Patents

U.S. and Foreign Patents Pending

Using a knife is an inherently dangerous activity. This product should be used with the utmost care and caution.

## MAINTENANCE

*(Do's and Don'ts)*

Clipits are all stainless steel construction which means minimal maintenance. We recommend that salt water be thoroughly rinsed off of the knife with fresh water, and oil or silicone be applied. An occasional drop of oil will insure smooth action. Pocket lint or dirt in the lock will not allow full contact of the lock. Use a paperclip, toothpick or pointed object to remove deposits.

**Do Not Pry** with a knife. It puts unnecessary stress on the pivot pin and tip of the blade, possibly causing damage to both.

**Do Not Hammer or Pound** on the blade or handle of this or any folding knife.

**Do Not Throw** this or any knife not designed for throwing.

## WARRANTY

Each Clipit is guaranteed to be free of all defects in manufacture or materials for one year from date of purchase. (Warranty **does not** cover abuse or damage caused by improper sharpening or sharpening done with devices other than authorized by Spyderco, Golden, CO.)

Should a problem arise, please return the knife to the address below with an explanation of the problem. Send all warranties via UPS to Spyderco, Inc. Please include a U.P.S. return address (P.O. Boxes are not deliverable.) Also include a day-time phone number.
