

# Spyderco

2002

# WELCOME TO THE WORLD OF Spyderco

**"Quality is the Product of a Good Attitude"™**

The name Spyderco is synonymous with quality. Every knife or sharpener we make is designed and manufactured with a single goal in mind, reliable high-performance.

When you hold a Spyderco in your hand you know you are holding quality. It is backed by more than 20 years of research and development to find the best possible steels and handle materials. It has been ergonomically designed to open easily and comfortably fit in your hand while cutting.

Our 2002 catalog is broken into specific usage sections. While a Spyderco knife will cut anything, some models are designed for specific cutting tasks. For that reason we have categorized our knives into the following sections:

**Sharpeners-** The sharpening section includes our Tri-Angle Sharpmaker and full-line of individual sharpening stones.

**Everyday Carry/Novelty-** Some are large, some small, regardless, the knives in this group are designed to be multi-functional for the cutting tasks you encounter daily.

**Outdoor/Hunting/Fishing-** Knives in this category have

proven themselves to be favorites with the outdoor enthusiasts. **Serving/Saving Professional-** This category lists the models of choice among those who serve, save and protect, including law enforcement, EMT, firemen and military personnel.

**Martial Blade Craft-** Knives in this section are designed for the practice of Martial Blade Craft, including self-protection, physical conditioning and control and coordination of the body. **Kitchen-** The full line of Spyderco's Pro-Culinaire kitchen cutlery is shown here.

**Promotional-** A section of display and promotional items to help you better serve your customer.

Welcome to the world of Spyderco. The information provided here is intended to introduce you to Spyderco knives and the company. If you do not find the information you seek... call us. We are here to assist you, our valued customer.

*The Spyderco Crew*

## Tri-Angle Sharpmaker 204MF

When you need to get it sharp, the 204 is all you need. Spyderco's Tri-Angle Sharpmaker includes two sets of high alumina ceramic stones. There is a pair of medium grit (brown) for aggressive sharpening and a pair of fine (white) for professional grade finishing. Also included are a set of brass safety rods to protect the user's hand during sharpening. For sharpening plain edges, the flat sides of the stones are ideal. For serrated edges use the corners. The stones fit into keyed holes and slots molded into the polymer base and have a 40° and 30° sharpening angle for knives and 12.5° scissor setting. Each stone has a groove running its length for sharpening pointed objects like darts, awls and fishhooks. Everything packs neatly into the base and the lid snaps shut making the 204 self-contained and small enough to take with you. No oil, water or lubricants are required during use for dry, mess-free sharpening. Includes instruction book and video (available in VHS, PAL and SECAM).

## Diamond Triangles 204D

New for 2002 we have added, as a separately sold accessory, a set of diamond coated triangles.

In short, if its got an edge or a point the Tri-Angle Sharpmaker will keep it sharp for life!

# Bench Stones

302

Available in three grits: fine, medium and ultra-fine. Because 302 benchstones are flat and broad they're highly effective for honing wide tools like plane irons, chisels and large blades. As with all Spyderco's ceramic sharpeners, the bench stones are used dry without oil or water. Each stone is sold separately and comes packaged in a rigid polymer storage case complete with non-skid rubber feet for tabletop use.

Model #	Stone Size	Medium Grit	Fine Grit	Ultra-Fine Grit	Type of Case
302M	2" x 8" x 1/2"	•			ABS Box
302F	2" x 8" x 1/2"		•		ABS Box
302UF	2" x 8" x 1/2"			•	ABS Box
303M	1" x 5" x 1/8"	•			Leather
303F	1" x 5" x 1/8"		•		Leather
303MF	1" x 5" x 1/4"	•	•		Leather
305M	1 15/16" x 3 1/4" x 1/4"	•			Leather

# Pocket Stones

303 & 305M

The 303 Pocket Stone is palm-sized and sold individually in a medium or fine grit.

Portable and versatile, Spyderco manufactures a variety of small pocket stones for field use and for honing small items. Each stone is sold separately, packaged in a leather carrying case and is sterilization/autoclave safe (great for dental tool sharpening).

The 303MF DoubleStuff is made up of both grit stones, sandwiched together with a bonding agent combining the best of both worlds.

The 305 Pocket Stone is available in medium grit only. The 305 stubby stone is Spyderco's smallest ceramic sharpener. You can take it anywhere.

# Ceramic Files

400F

Whether you're a jeweler, gunsmith or dental assistant these small stones fit the bill for detailed sharpening. Available in four distinct shapes (fine grit only): Round, square, triangular and slip. Stones are sold individually packaged in a plastic tube, or as a set of four in a snap-front suede pouch.

Model #	Stone Size	Medium Grit	Fine Grit	Type of Case
400F	5" x 1/4"		•	Leather

Round

Square

Triangular

Slip

# Profile

701

Available in both fine and medium grits, ProFile stones sharpen knives, darts, and router bits. They also work wonders when de-burring machined items. The elliptical shape translates into four distinct sharpening surfaces, a flat surface and large radius for plain edges, a small radius for serrated edges and a groove for pointed tips. Includes instructions and suede leather pouch. The two grits are sold individually or can be purchased as a pair.

# Profile

702

A half-sized version of the 701 Profile stones, available in both fine and medium grits. These 4 inch stones are your best friend for use outdoors, in the field, or the range. Tucked away in a jacket pocket, tackle box or backpack they feature an elliptical shape with four defined sharpening surfaces. No more excuses for dull fishhooks, knives, axes and other outdoor gear. The 702 outdoor pocket stones are sold separately or as a set packaged in a split leather case.

Model #	Stone Size	Med. Grit	Fine Grit	Type of Case
701MF	3/4" x 8" x 1/4"	•	•	Leather
701M	3/4" x 8" x 1/4"	•		Leather

702M	3/4" x 4" x 1/4"	•		Leather
702F	3/4" x 4" x 1/4"		•	Leather

# Dragonfly C28BK

This is a great little knife with a lot of cutting power. It's ergonomically designed with a comfortable choil for your forefinger and a spine rest for the thumb. Makes an ideal everyday carry for ladies or gents.

- Flat ground blade in AUS-8 steel.
- Available in PlainEdge or SpyderEdge.
- Handle is black FRN with volcano grip texture.
- Integral clip provides tip up carry.

Dragonfly C28BK	
Blade Steel.....AUS-8	Length Blade.....2 5/16" 58mm
Blade Thickness.....3/32" 2.4mm	Length Closed.....3 1/4" 82mm
Diam. Blade Hole.....7/16" 11mm	Length Cutting Edge.....1 7/8" 48mm
Edge Type...SpyderEdge, PlainEdge	Length Overall.....5 7/16" 138mm
Weight.....1.2oz 33g	

# Dragonfly SS C28

This slightly heftier Dragonfly is all stainless steel. Every bit as ergonomic as the lightweight it too is a great everyday carry. Easily engraved or embellished it becomes a favorite gift for the person who thinks they have everything.

- Blade is flat ground ATS-55.
- Available in both PlainEdge and SpyderEdge.
- Metal clip is positioned for tip up carry.

Dragonfly SS C28	
Blade Steel.....ATS-55	Length Blade.....2 5/16 58mm

Diam. Blade Hole.....7/16" 11mm	Length Cutting Edge.....1 7/8" 48mm
Edge Type...SpyderEdge, PlainEdge	Length Overall.....5 7/16" 138mm
Weight.....2.6oz 73g	

# Cricket C29BK

This little oval shaped knife is a favorite with everyone because it's so handy. Small and cute with a reverse "S" blade it is great for delicate cuttings jobs and craft projects. It is small enough to clip to a shirt collar, use as a tie tack, or a money clip.

- Hollow ground blade is ATS-55 steel.
- Linerlock locking system.
- Available in both PlainEdge and SpyderEdge.
- Black FRN volcano grip patterned handle.
- Metal pocket clip for tip down carry.

Cricket C29BK	
Blade Steel.....ATS-55	Length Blade.....1 7/8" 48mm
Blade Thickness.....5/64" 2mm	Length Closed.....2 3/4" 70mm
Diam. Blade Hole.....7/16" 11mm	Length Cutting Edge.....1 11/16" 43mm
Edge Type...SpyderEdge, PlainEdge	Length Overall.....4 11/16" 117mm
Weight.....1.25oz 36g	

# Dyad Jr. C39BK

Spyderco upgrades grandpa's old-time two bladed pocketknife to a one-hand opener with our Dyad Jr. One blade is a hollow-ground, fully serrated Sheepfoot style, the other is a flat ground clip-point, giving you five inches of cutting power in two blades. It doesn't have a clip but this powerful little knife takes up very little room in your pocket.

- Two blades of ATS-55 steel that open independently.
- Each blade has its own locking mechanism.
- Each blade has its own opening hole.
- Black FRN handle with volcano grip texture.
- No clip.

Dyad Jr. Lightweight C39BK	
Blade Steel.....ATS-55	Length Blade.....2 1/4" 58mm
Blade Thickness.....5/64" 2mm	Length Closed.....3 3/32" 79mm
Diam. Blade Hole.....3/8" 10mm	Length Cutting Edge.....2 1/8" 54mm, 2 3/16" 50mm
Edge Type...SpyderEdge, PlainEdge	Length Overall.....5 5/8" 143mm
Weight.....1.5 oz 42.5g	

Not intended to be used with both blades open.

# Native C41BK

The Native is specifically engineered for the human hand to maximize cutting ability and minimize user fatigue and discomfort. The FRN handle is textured in a bi-directional pattern designed to prevent forward or backward slipping. Added to that is a deep finger choil and textured blade spine for controlled and comfortable cutting.

A swedge grind along the top of the blade reduces the overall weight of the knife. Model is manufactured in both Seki City, Japan and Golden, CO USA.

- The blade steel is VG-10 (Japanese manufacture) or CPM440V (US manufacture).
- The black metal clip is ambidextrous and positions the knife for tip-up carry.
- The C41 is available in a Plainedge or 35/65 combo.

Native C41	
Blade Steel.....VG-10/CPM440V	Length Blade.....3 1/8" 80mm
Blade Thickness.....1/8" 3mm	Length Closed.....3 15/16" 100mm
Diam. Blade Hole.....15/32" 12mm	Length Cutting Edge.....2 5/8" 66mm
Edge Type.....PlainEdge, 35/65	Length Overall.....7" 179mm
Weight.....2.4oz 69g	

# Native SS C41

The all stainless steel C41 Native SS has all the ergonomics of its lightweight cousin. A favorite gift knife, the stainless steel handle invites engraving or embellishment to make it even more special.

- Blade is hollow-ground AUS-10 steel.
- Available in PlainEdge and 50/50 combination.
- Metal clip is ambidextrous for a tip up carry.

Native SS C41	
Blade Steel.....AUS-10	Length Blade.....3 1/8" 80mm
Blade Thickness.....1/8" 3mm	Length Closed.....3 15/16" 100mm
Diam. Blade Hole.....15/32" 12mm	Length Cutting Edge.....2 5/8" 66mm
Edge Type.....PlainEdge, 50/50	Length Overall.....7" 178mm
Weight.....4.6oz 131g	

# Howard Viele C42

Sleek, polished and sophisticated is the only way to describe this collaboration with renowned knifemaker Howard Viele. The tapered hollow ground blade sports Howard's signature logo of three small holes over the symbol of the Japanese God of War. It features a traditional linerlock and also has an eccentric pivot pit.

- Blade steel is hollow-ground VG-10.
- Handle is black Micarta overlaid on stainless steel.
- Available in PlainEdge and SpyderEdge.
- Metal clip provides a low tip down carry.

Howard Viele C42	
Blade Steel.....VG-10	Length Blade.....3 3/8" 86mm
Blade Thickness.....1/8" 3mm	Length Closed.....4 7/16" 113mm
Diam. Blade Hole.....11/32" 9mm	Length Cutting Edge.....3 1/4" 82mm
Edge Type...SpyderEdge, PlainEdge	Length Overall.....7 3/4" 197mm
Weight.....3.8oz 109g	

# Peter Herbst

## C53

Spyderco's first collaboration with a German knifemaker, the Peter Herbst makes an ideal everyday carry knife. It combines a linerlock with stylish European tradition and sleek modernism.

- Blade is hollow ground VG-10 steel.
- Handle material is Almite coated aluminum with a unique grooved pattern.
- Available in PlainEdge only.
- All metal clip is right handed and carries tip down.

Peter Herbst C53	
Blade Steel.....	VG-10
Blade Thickness.....	1/8" 3mm
Diam. Blade Hole.....	7/16" 11mm
Edge Type.....	SpyderEdge, PlainEdge
Weight.....	4 oz 113g
Length Blade.....	3 1/16" 78mm
Length Closed.....	4 3/32" 104mm
Length Cutting Edge.....	2 7/8" 72mm
Length Overall.....	7 5/32" 182mm

# Tim Zowada

## C56

Reminiscent of the archetypal dirk, the C56, designed by custom knifemaker Tim Zowada, has a prominent unsharpened top swedge, hollow ground spear point blade and a linerlock. The knife's tapered look is enhanced by the downsized hole and coffin shaped handle of bead-blasted Micarta.

- The blade steel is hollow-ground VG-10.
- Available in PlainEdge.
- Black metal clip with gold bug provides tip down right handed carry.
- Batch item only, availability subject to demand.

Tim Zowada C56	
Blade Steel.....	VG-10
Blade Thickness.....	1/8" 3mm
Diam. Blade Hole.....	2 1/64" 8.5mm
Edge Type.....	PlainEdge
Weight.....	3.1oz 88g
Length Blade.....	3 3/16" 81mm
Length Closed.....	4 7/16" 113mm
Length Cutting Edge.....	3" 76mm
Length Overall.....	7 11/16" 195mm

# D'Alton Holder Toad

## C57

The C57 Toad is the smallest knife in the Spyderco line. It is small but it is packed with features. It has a linerlock, traditional hole in the blade and an Almite coated aluminum handle. This socially acceptable little knife makes a great gift not to mention money clip.

- Blade steel is AUS-8
- Available in PlainEdge.
- Metal clip gives a right handed tip down carry.
- Batch item only, availability subject to demand.

D'Alton Holder Toad C57	
Blade Steel.....	AUS-8
Blade Thickness.....	1/8" 3mm
Diam. Blade Hole.....	11/32" 9mm
Edge Type.....	PlainEdge
Weight.....	1.8oz 52g
Length Blade.....	1 7/16" 36mm
Length Closed.....	2 9/16" 66mm
Length Cutting Edge.....	1 7/16" 36mm
Length Overall.....	4" 102mm

# Eduard Bradichansky Shabaria

## C59

Israeli knifemaker Eduard Bradichansky introduced us to this definitely different looking knife. The Shabaria is reminiscent of the fix bladed knives carried for centuries by the Nomadic people of the Jordan River Valley. Shabaria refers to the shape of the blade which has been used for everything from utility cutting to self defense. Made of black lustrous Micarta, the hourglass shape of the handle is amazingly comfortable in the hand and has a linerlock.

- Blade steel is hollow-ground VG-10.
- Available in PlainEdge.
- Black metal clip with gold bug provides tip down, right hand carry.
- Batch item with availability as demanded.

Eduard Bradichansky Shabaria C59	
Blade Steel.....	VG-10
Blade Thickness.....	3/32" 2.5mm
Diam. Blade Hole.....	15/32" 12mm
Edge Type.....	PlainEdge
Weight.....	3.33oz 94g
Length Blade.....	3 13/16" 97mm
Length Closed.....	4 13/16" 122mm
Length Cutting Edge.....	3 11/16" 93mm
Length Overall.....	8 5/8" 219mm

# Navigator

## C62

This attractive knife is small, socially acceptable and lightweight but can still handle serious cutting jobs. It feels comfortable in your hand, thanks to the ergonomics we designed in to it. Above the hole is a crown/cusp that gives your thumb stable positioning. The handle is sculpted for your hand and fingers to fall into the "sweet spots" for a balanced grip. We removed weight and added style by cutting slots in the gunmetal blue Almite coated handle. This is definitely an everyday carry.

- Blade is hollow ground VG-10 steel.
- Available in PlainEdge and fully serrated SpyderEdge.
- Metal clip provides right handed tip down carry.

Navigator C62	
Blade Steel.....	VG-10
Blade Thickness.....	1/8" 3mm
Diam. Blade Hole.....	1/2" 12mm
Edge Type.....	SpyderEdge, PlainEdge
Weight.....	.2oz 56g
Length Blade.....	2 1/8" 54mm
Length Closed.....	3 5/16" 84mm
Length Cutting Edge.....	1 13/16" 47mm
Length Overall.....	5 3/8" 137mm

# MeerKat

## C64

Once you discovered how to close the MeerKat you won't let it out of your hand. Your fingers and thumb fall into the divots we designed into the handle making it easy to master. Just in case, we put instructions in the box. Releasing the Phantom Lock™ by pushing your thumb forward allows the blade to fall into place in the handle. It's a handy little knife to have with you for those everyday cuts. It's available in two blade styles, a modified drop point and a reverse "S" (Cricket-like).

- Blades are hollow ground 440C or AUS-6 steel.
- Handle is textured black FRN with finger divots.
- Available in PlainEdge and SpyderEdge.
- New wire clip is ambidextrous and carries tip down.

MeerKat C64	
Blade Steel.....	440C/AUS-6
Blade Thickness.....	3/32" 2.2mm
Diam. Blade Hole.....	15/32" 12mm
Edge Type.....	SpyderEdge, PlainEdge
Weight.....	2.2oz 62g
Length Blade.....	1 15/16" 50mm
Length Closed.....	3 5/16" 83mm
Length Cutting Edge.....	1 5/8" 42mm
Length Overall.....	5 1/4" 133mm

# Bob Lum Chinese Folder

C65

The leaf shape blade has long been used in China for everything from general utility to hunting and tactical applications. Bob Lum merges this interesting blade shape with some very modern features like a nested linerlock and an adjustable eccentric pivot pin.

- Blade steel is flat ground VG-10.
- Aluminum handle is Almite coated in Imperial Jade Green.
- Available in PlainEdge or SpyderEdge.
- Pre-drilled holes allow metal clip to be positioned for a tip up or tip down carry.

Bob Lum Chinese Folder C65	
Blade Steel.....	VG-10
Blade Thickness.....	1/8" 3mm
Diam. Blade Hole.....	15/32" 12mm
Edge Type.....	PlainEdge, SpyderEdge
Weight.....	2.75oz 77g
Length Blade.....	3 3/16" 80mm
Length Closed.....	4 1/4" 108mm
Length Cutting Edge.....	2 15/16" 74mm
Length Overall.....	7 3/16" 183mm

# Frank Centofante Vesuvius

C66

One of the first knives to feature our Compression Lock, the Vesuvius, designed by custom knifemaker Frank Centofante is an attractive yet practical everyday carry. Whether you prefer the subtle, classy black FRN handle with gripping grooves accented by a silver bug or the flashier shell inlay you'll agree that this knife will handle all your cutting needs.

- Blade is hollow-ground ATS-34 steel.
- Handle is black FRN with a silver bug or blue inlaid shell.
- Available in PlainEdge, SpyderEdge or 50/50 combination.
- Black metal clip allows for right hand, tip up or tip down carry.
- Made in our Golden, Colorado plant.

Frank Centofante Vesuvius C66	
Blade Steel.....	ATS-34
Blade Thickness.....	3/32" 2.5mm
Diam. Blade Hole.....	1/2" 13mm

Weight.....	3.4oz 96g
Length Blade.....	3 1/8" 79mm
Length Closed.....	4 1/2" 114mm
Length Cutting Edge.....	3 1/8" 79mm
Length Overall.....	7 9/16" 192mm

# Salsa

C71

We designed the Salsa for those who need a little color in their knife. The size and shape is small, comfortable and will do everyday cutting jobs with ease. New for 2002 we are introducing the Cobra Hood™ on the back of the hump making it even easier to open our knives. For added spice, this knife is available in an all titanium handle with an integral Compression Lock, or with an aluminum handle in three anodized colors, blue, green and tan with a nested Compression Lock.

- Blade steel is ATS-34 on the titanium model and AUS-8 on the aluminum.
- Handles are titanium or anodized aluminum.
- Available in SpyderEdge and PlainEdge.
- New wire clip on aluminum handle is ambidextrous for tip up carry.

# Jester JBK

Say hello to Jester, our new mini lockback. Carry it on your keychain, in your purse or pocket. It will take care of those pesky little every day cuts. Surprisingly comfortable in your hand, we added texture on the spine near the tip and just behind the hole to assist you with the intricate cuts required for craft projects. This little powerhouse comes in black, lime green and fushia textured FRN.

- Blade is hollow ground AUS-6 steel.
- Handle is textured FRN in colors listed above.
- Available in PlainEdge and SpyderEdge.
- Clipless.

**Jester JBK**

Weight.....3 1/4oz 93g	

# SpydeRench T01

Recently, a prominent men's magazine dubbed the SpydeRench a "toolbox on hyper-steroids." Designed by an aerospace engineer this multi-tool is in a class by itself. Its many features include:

- Full-sized locking knife blade.
- Slip joint pliers with a large and small bite.
- 9/16" crescent wrench.
- Four standard sized bits (#2 and #3 Phillips head and #1 and #2 flat head) are housed inside the handle. These are replaceable with any standard size bits, even Allen and Torx.
- Long bit for "tunneled" electronic repairs features a Phillips head and flat head and is diamond coated for use as a file.
- File has a concave, convex and flat sharpening surface for deburring and honing.
- Pivot pin rotates, opening the tool to full length.
- Two halves separate allowing use of the crescent wrench and screwdriver at the same time.
- Knife can be used with tool separated or together.
- Body is investment-cast 17-4ph corrosion resistant stainless and chamfered for comfort.
- Blade is 440C steel.
- Available in PlainEdge, SpyderEdge or 50/50 combination.
- Metal pocket clip provides a tip down carry.

**T01 SpydeRench**

Blade Steel.....440C	Length Blade.....2 1/2" 63mm
Blade Thickness...3/32" 2.25mm	Length Closed.....4 5/8" 117mm

Edge Type...SpyderEdge, PlainEdge, 50/50	Length Overall.....7 3/32" 180mm
Weight.....7.6oz 217g	

# Harpy C08

Appropriately named, our C08 Harpy resembles the claw of an eagle. Designed for controlled, pulling cuts, the hawkbill blade shape comes from the marine/commercial fishing industry where severing rope, line, webbing or netting is done at arm's length quickly and effectively. The curved arc of the blade keeps what you are cutting from slipping off the tip.

- Blade is hollow ground VG-10 steel
- David Boye dent in the locking lever allows for gripping the handle tightly without accidentally unlocking the blade.
- Stainless steel handle has a cutout for fast drying when used in or around water.
- Metal clip is positioned for a tip down carry.

Harpy C08S	
Blade Steel.....VG-10	Length Blade.....2 3/4" 70mm
Blade Thickness.....1/8" 3mm	Length Closed.....3 7/8" 99mm

Edge Type...PlainEdge, SpyderEdge	Length Overall.....6 1/2" 165mm
Weight.....3.75oz 106g	

# Merlin C08BK

The Merlin has the same great cutting power as our Harpy but with a few different features.

- Blade steel is VG-10.
- Lightweight black FRN scales have a volcano style texture for gripping power.
- Also has the David Boye dent in the locking lever.
- Available in both PlainEdge and fully serrated SpyderEdge.
- The black clip is ambidextrous and carries tip up.

Weight.....2.5oz 71g	

# Pro-Grip SS C13

This hardy knife loves to work. A favorite all around outdoor knife of cowboys and hunters alike, it is also a trusty companion for everyday use.

- Drop-point style blade is hollow-ground, VG-10 steel.
- In addition to its usual 50/50 combination edge we've added a new PlainEdge version.
- Kraton inserts in the handle and clip gives it a non-slip grip.
- Metal clip positioned for tip down carry.

Pro-Grip SS C13	
Blade Steel.....VG-10	Length Blade.....2 13/16" 71mm
Blade Thickness.....1/8" 3mm	Length Closed.....3 7/8" 98mm

Edge Type.....PlainEdge, 50/50	Length Overall.....6 5/8" 168mm
Weight.....4oz 112g	

# Pro-Grip C13BK

The lightweight Pro-Grip works just as hard as its heftier brother. It too is a favorite for outdoor use and everyday carry.

- Drop-point style blade is hollow-ground VG-10.
- Kraton insert in handle and under end of clip for added gripping power.
- Available in new PlainEdge or 50/50 combination.
- Pocket clip is integrated into the black FRN volcano grip handle for tip up carry.

# Catcherman C17

A flexible folder?

Yes, our Catcherman is a flexible filet knife that folds up for easy carry on your next fishing trip. A special feature is the small section of serrations at the base for aggressive cutting when scaling or de-boning.

- Blade steel is MBS-26 which gives excellent edge retention and flexibility as well as being rust resistant.
- Blade is flat ground and thinner at the tip making it semi-flexible for filleting.
- Black FRN handle with volcano pattern holds your grip.
- Edge configuration is a 75/25 plain/serrated combination.
- Clip is molded into the handle and provides tip up carry.

# Snap-It C26

A favorite of outdoor sportspeople. You can Snap-It anywhere, to a carabiner, vest, PFD, bootlace, backpack, belt loop, you name it. Its Wichard-style snap shackle allows for quick deployment yet keeps it in place and out of the way when not in use.

- Sheepfoot style (rounded tip) hollow-ground blade in AUS-8 steel.
- Fully serrated for aggressive cutting.
- Black FRN handle with Kraton inserts for non-skid grip.
- Snap shackle instead of clip.

# Bill Moran Featherweights FB01 / FB02

Bill Moran is the grandfather of custom knifemaking. Spyderco is proud to offer two of his classic designs. The FB01 has an upswept trailing point blade shape and the FB02 is a drop point style. Both have a very comfortable FRN handle with Kraton inserts for a great grip. Highly recommended for hunting, camping and the great outdoors. Both are equipped with a Kydex sheath and multi-position Tek-Lok.

- Blade is flat ground VG-10 steel.
- Handle is black FRN with Kraton inserts.
- Available in PlainEdge.
- Kydex sheath.

# Bob Lum Tanto

FB03

We can thank Bob Lum for introducing America to the Asian Tanto style blade. It is only natural that Spyderco follow-up Bob Lum's folding tanto with a fixed blade, and a very classy one at that. It has a Hamaguri (appleseed) grind at the tip for added strength and the swedge on the spine lessens the overall weight. The blade has a tapered tang, running the full length of the handle, adding overall strength. The expanded hand guard, where the blade and handle meet, makes it comfortable in the hand. Included is a leather sheath.

**NEW!**

Bob Lum Fixed Blade Tanto FB03	
Blade Steel.....AUS-8	Length Blade.....4 3/16" 107mm
Blade Thickness.....3/16" 4.5mm	Length Closed.....N/A

Weight.....4.5oz 126g	

- Blade steel is hollow-ground AUS-8.
- Handle is black linen Micarta.
- Available in PlainEdge.
- Clipless with a leather sheath.

# Fred Perrin

FB04

Fred Perrin, former French Army Commando and world-class martial artist has designed a utilitarian and uncomplicated knife. A weight reducing swedge on front of the spine and texturing at the base of the spine add purchase for your thumb and lessen weight. You'll find your forefinger fits perfectly in the pronounced choil and the molded black FRN handle has Kraton inserts for additional gripping power. Included is a Kydex sheath.

**NEW!**

Fred Perrin Clip-Point Bowie FB04

Edge Type.....PlainEdge	Length Overall.....9 3/8" 238mm
Weight.....3.75oz 1.07g	

- Blade is flat ground VG-10 steel.
- Handle is molded black FRN with Kraton inserts.
- Available in PlainEdge.
- Kydex sheath.

# Temperance

FB05

Spyderco's Temperance is a serious entry into the fixed blade market. Designed in-house by Sal Glesser, it is a hefty all around knife. Sporting a flat ground 4 1/2 inch blade, it is at home hunting, camping or even in the kitchen. The molded FRN handle is ergonomically sound, fitting most hands very comfortably, and the four dimples in the handle are positioned for grip and indexing.

- Blade is flat ground VG-10 steel.
- Handle is black molded FRN.
- Available in PlainEdge or SpyderEdge.
- Clipless, comes with a Kydex sheath.

# G-SAKAI

G. Sakai is based in Seki, Japan, a small town famous for cutlery production. Founded on the traditions of sword-making dating back more than one thousand years, this premium pocket knife company is dedicated to evolution and constant refinement in its product development. The company mission is to provide the best performance for each specialized design, such that every knife incorporates the latest technology and uncompromising artisanship typical of G. Sakai. Refined art and the critical touch of a master infuse life into every G. Sakai knife, upholding the prominent status the company holds among the knife lovers of the world.

# Bird & Trout Series

TA101 / TA102 / TA103

G. Sakai knives combine form and function beautifully. Their Bird & Trout Series are small game and fish knives designed for performance that just happen to be eye appealing too. The point of the thin hollow-ground blade tapers upward for heightened control and it has a sharpened false edge atop the blade. The top lock is positioned at the rear.

- Blade steel is hollow ground AUS-6.
- Handles are black Micarta with brushed stainless bolsters.
- Available in PlainEdge only.
- Clipless, comes with a Cordura belt sheath.

WOODHOODS INC. - FIRSTING

WOODHOODS INC. - FIRSTING

# Endura SS

## C10

- Modified skinning-style blade is hollow ground AUS-6 high carbon steel.
- Available in PlainEdge, SpyderEdge or 50/50 combo.
- A David Boye dent has been added to the locking lever for 2002.
- Stainless steel handle is perfect for custom engraving and embellishment.
- Two sets of pre-drilled holes allow the metal clip to be positioned for a tip up or tip down carry.

**IMPROVED!**

<b>Endura SS C10</b>	
Blade Steel.....AUS-6	Length Blade.....3 3/4" 96mm
Blade Thickness.....1/8" 3mm	Length Closed.....4 13/16" 122mm
Diam. Blade Hole...15/32" 12mm	Length Cutting Edge...3 1/4" 83mm
Edge Type...SpyderEdge, PlainEdge, 50/50	Length Overall.....8 1/2" 216mm
Weight.....5.5oz 156g	

Steel handled knives are excellent for hard-use by virtue of their heft and solidity. Our C10 Endura does the job.

# Delica SS

## C11

- The all stainless version of our popular Delica. It is slightly beefier and provides a sense of solidity yet doesn't feel like you are carrying a heavyweight.
- Blade steel is hollow ground AUS-6.
- A David Boye dent has been added to the locking lever for 2002.
- Available in both PlainEdge, SpyderEdge and 50/50 combination.
- Stainless steel handle great for engraving or embellishing.
- Pre-drilled holes for the metal clip allow for tip up/tip down carry.

**IMPROVED!**

Weight.....4 oz 110g	

# Endura

## C10BK

- Our Endura model is the cornerstone of the knife industry and started the trend toward lightweight folders. It is a favorite everyday carry and everyday work knife for the folks in the serving and saving professions.
- For 2002 we have changed the blade steel to VG-10.
  - Look closely and you will notice a new grind; its flat, not hollow.
  - Available in three edge configurations, PlainEdge, SpyderEdge and a 50/50 combo.
  - A David Boye dent is a part of the locking lever.
  - The scales are black FRN with a volcano grip texture.
  - Has a deeper clip well to eliminate rotation of the black ambidextrous clip which carries tip up.

**IMPROVED!**

Weight.....2.9oz 82g	

# Delica

## C11BK

- A favorite with just about everyone, our lightweight Delica does it all. You'll find it being used by all branches of serving and saving professionals as well as everyday use around the home, job or recreation. It's that perfect knife you want with you at all times.
- New for 2002 we have changed to VG-10 steel.
  - The grind has changed too, it's now flat.
  - Available in three edge configurations, PlainEdge, SpyderEdge and 50/50 combination.
  - Black lightweight FRN handle with volcano grip pattern.
  - David Boye dent in locking lever.
  - Has a deeper clip well to eliminate rotation of the ambidextrous clip which carries tip up.

Weight.....1.9oz 54g	

# Endura Trainer

## C10TR

- A trainer, also known as a drone, is just like a "live" knife in weight and size but the blade has a dull edge and rounded tip. Use a trainer when you want to practice opening and closing with one hand, fast retrieval and of course Martial Blade Craft moves.
- Blade steel is AUS-6 with an unsharpened edge and tip.
  - Has a red volcano grip handle that readily identifies it as a trainer.
  - David Boye dent for tight gripping without accidentally releasing lock.
  - Black ambidextrous clip for tip up carry.

<b>Endura Trainer C10TR</b>	
Blade Steel.....AUS-6	Length Blade.....3 15/16" 100mm
Blade Thickness.....1/8" 3mm	Length Closed.....4 15/16" 125mm
Diam. Blade Hole...15/32" 12mm	Length Cutting Edge.....N/A
Edge Type.....N/A	Length Overall.....8 7/8" 223mm
Weight.....3.14oz 89g	

# Delica Trainer

## C11TR

- You'll want to keep one of these close at hand to assist that new customer to practice opening and closing the blade without fear of them getting hurt. It is the same size as a "live" Delica but can be handled by the Newbie with ease.
- Blade steel is AUS-6 with unsharpened edge and tip.
  - David Boye dent just like the live knife.
  - Red FRN handle with volcano grip pattern.
  - Black ambidextrous clip for tip up carry.

<b>Delica Trainer C11TR</b>	
Blade Steel.....AUS-6	Length Blade.....3" 77mm

SAVING PROFESSIONALS

SAVING PROFESSIONALS

# Police Model

## C07

- The choice of law enforcement officers for over a decade, the C07 is a workhorse. It was designed to provide a lot of cutting power in a slim comfortable handle.
- The blade is hollow ground VG-10 steel with a weight-reducing swedge at the tip.
  - The David Boye dent in the locking lever allows for a tight grip without accidentally releasing the lock.
  - The all stainless handle is perfect for engraving or embellishing.
  - Available in PlainEdge, SpyderEdge and 50/50 combination.
  - It also has a metal pocket clip for tip down carry.

Police Model C07	
Blade Steel.....	VG-10
Blade Thickness.....	1/8" 3mm

Edge Type.....	SpyderEdge, PlainEdge, 50/50
Weight.....	5.5 oz 155g
Length Blade.....	4 1/8" 104mm
Length Closed.....	5 5/16" 135mm
Length Cutting Edge.....	3 13/16" 97mm
Length Overall.....	9 7/16" 240mm

# Military Model

## C36GE

- This heavy-duty knife is chock full of special features. The ergonomics include a comfortable choil and machined texturing (on the spine behind the hole) for a comfortable and safe grip for tough cutting. We enlarged the hole for easy opening/closing with gloved hands.
- Flat ground modified clip-point blade made of CPM-440V steel holds an edge longer.
  - Linerlock is nested for added strength and reduced thickness.
  - G-10 handles are slender and resistant to climate and chemicals.
  - Spacers between the scales allow easy rinsing of field dirt and grime.
  - Available in PlainEdge, SpyderEdge and a 50/50 combo.
  - Specially designed black metal clip for tip down carry.
  - Manufactured in our Golden, Colorado plant.

Military Model C36GE	
Blade Steel.....	CPM440V

Diam. Blade Hole.....	9/16" 14mm
Edge Type.....	SpyderEdge, PlainEdge, 50/50
Weight.....	4 oz 113g
Length Blade.....	4" 102mm
Length Closed.....	5 1/2" 139mm
Length Cutting Edge.....	3 11/16" 94mm
Length Overall.....	9 1/2" 242mm

# Rescue Jr.

## C45OR/BK

- The folder you need when you want to cut something, not someone. The Rescue Jr. has a sheepfoot blade that is rounded at the tip. Specially designed ergonomics provide a comfortable choil for the forefinger and the hump over the hole gives purchase for the thumb. An excellent knife for emergency personnel (cutting seatbelts), rafters (using inflatables), ranchers (cutting around livestock), just to name a few.
- Blade is hollow ground sheepfoot style made of VG-10 steel.
  - Fully serrated for aggressive cutting.
  - FRN handle with volcano grip texture comes in Black or Orange.
  - Metal clip is ambidextrous and carries tip up.

Rescue Jr. C45	
Blade Steel.....	VG-10
Blade Thickness.....	1/8" 3mm
Diam. Blade Hole.....	15/32" 12mm
Edge Type.....	SpyderEdge
Weight.....	2.1oz 60g
Length Blade.....	3 1/8" 79mm
Length Closed.....	4 1/8" 104mm
Length Cutting Edge.....	2 5/8" 67mm
Length Overall.....	7 3/16" 183mm

# Bob Lum

## C46

- Bob Lum is the first American knifemaker to introduce the Asian tanto-style blade to the U.S. It features a "hamaguri" or appleseed grind at the tip for added strength. The flat-topped hump above the hole provides a comfortable positioning spot for your thumb for controlled cutting. It has a linerlock nested in its G-10 scales with an eccentric pivot pin and an offset arc ramp that adjusts itself as the liner wears.
- Blade is black coated, hollow-ground ATS-55 steel.
  - Available in PlainEdge or 60/40 combination.
  - Lined lanyard hole.
  - Black metal clip provides tip up carry.

Bob Lum C46	
Blade Steel.....	ATS-55
Blade Thickness.....	1/8" 3mm
Diam. Blade Hole.....	15/32" 12mm
Edge Type.....	60/40, PlainEdge
Weight.....	5.1 oz 145g
Length Blade.....	3 13/16" 97mm
Length Closed.....	5" 127mm
Length Cutting Edge.....	3 7/16" 88mm
Length Overall.....	8 3/4" 223mm

SAVING LIVES

SAVING LIVES

Martial Blade Craft (MBC) is a term that Spyderco developed to describe bladed combat arts. The term "knife fighting" is not only negative but quite unrealistic since "knife fighting" rarely occurs and is used more for Hollywood glamour. Martial Blade Craft is an art form that will one day find Olympic presence as does Judo and Fencing.

However, studied as an art form, Judo, Martial Blade Craft or any other martial art does have value in self protection, should the need arise. The

purpose of any martial art is (or should be) to stop the bad guy from hurting the innocents.

Though many knife manufacturers produce models for combative arts, it is not an area that Spyderco has in the past actively promoted. The models presented in this section were designed by and for Martial Blade Craft practitioners.

Fully functional trainers or drones are currently being produced for some models with others scheduled for future production. Trainers will be produced with red handles to differentiate them from a live blade.

## Massad Ayoob

C60

An interesting feature of the Massad Ayoob design (a nationally renowned writer and authority on firearms and knives) is that when in the hand, the handle feels like an extension of the blade. The blade goes wherever you point your wrist. It has a finger choil and texturing on the back of the spine for your thumb to grip.

- Blade steel is hollow ground VG-10.
- Black Almitite coated aluminum handle.
- Available in PlainEdge.
- Black clip with gold bug is ambidextrous and carries tip down.
- Recommended for MBC use.

Massad Ayoob C60	
Blade Steel.....	VG-10
Blade Thickness.....	1/8" 3mm
Diam. Blade Hole.....	15/32" 12mm
Edge Type.....	PlainEdge
Weight.....	4.3oz 122g
Length Blade.....	3 5/8" 92mm
Length Closed.....	5 1/16" 128mm
Length Cutting Edge.....	3 3/8" 86mm
Length Overall.....	8 7/16" 215mm

## Bram Frank Gunting

C68 / C68TR

Bram Frank, a martial arts "Hall of Famer," designed the Gunting specifically for Martial Blade Craft. The appendage on the upper side of the blade allows for kinetic opening by leveraging the blade against an object or opponent. The protrusions on the handle can be used like a Yawara stick for pressure point control while subduing an opponent. We added our extra strength Compression Lock and indexing/control divots in the handle and clip. This knife is becoming popular with law enforcement personnel as well as Martial Blade Crafters.

- Blade steel is CPM 440V and hollow ground.
- Handle material is black G-10.
- Available in PlainEdge and 50/50 combination.
- Special metal clip designed for indexing/control.
- Made in our Golden, Colorado plant.

Bram Frank Gunting C68	
Blade Steel.....	CPM 440V
Blade Thickness.....	1/8" 3mm
Diam. Blade Hole.....	7/16" 11mm
Edge Type.....	PlainEdge, 50/50
Weight.....	5.9oz 168g
Length Blade.....	2 7/8" 74mm
Length Closed.....	5 7/16" 131mm
Length Cutting Edge.....	2 3/4" 71mm
Length Overall.....	8" 202mm

To become accomplished at anything takes practice. This is especially true for Martial Blade Craft. The Gunting Trainer was developed for safe practice. It is the same size and weight as the "live" version and it has the same special features. It is a trainer, so we rounded all the sharp points and left the blade tip and edge unsharpened. The practice part is left to you.

- Blade steel is GIN-1.
- Handle material is red G-10 denoting it's a trainer.
- Edge is unsharpened for safety.
- Special metal clip for indexing/control.
- Made in our Golden, Colorado plant.

Gunting Trainer C68TR	
Blade Steel.....	GIN-1
Blade Thickness.....	1/8" 3mm

Weight.....	5.7oz 161g
Length Blade.....	3 1/16" 77mm
Length Closed.....	5 7/16" 131mm
Length Cutting Edge.....	N/A
Length Overall.....	8 1/16" 205mm

## James A. Keating Chinook

C63

Designed by Master at Arms James A. Keating, the C63 Chinook is a hefty knife. It was originally designed for Martial Blade Craft but can also be found in the field doing heavy duty work as a hunting/camping knife. The blade is an upswept modified Bowie-style and features a strong lockback. Built in ergonomics include a comfortable finger choil and texture on the back of the spine for extra thumb purchase for tough cuts.

- Blade steel is hollow ground CPM 440V.
- Handle is black G-10
- Available in PlainEdge and 50/50 combination.
- Black metal clip provides right handed tip down carry.

James A. Keating Chinook C63

Length Closed.....	4 7/8" 124mm
Length Cutting Edge.....	3 5/16" 84mm
Length Overall.....	8 9/16" 217mm

## Lil' Temperance

C69

Spyderco's Lil' Temperance is not a lil' knife. It is a no-nonsense power-packed knife designed in-house by Sal Glesser. Although it has all the important features for Martial Blade Craft it can be at home at the work site too. Its 3-inch blade comes in two shapes, an upswept trailing point and a modified spear point.

- We enlarged the hole and carved out one side of the green G-10 handle making it very ergonomically comfortable in your hand. It also has our new strong Compression Lock (nested).
- Blade steel is flat ground CPM 440V.
- Handle material is green G-10.
- Available in PlainEdge.
- Specially designed metal clip, with indexing/control holes, provides a tip up or tip down carry.

Lil' Temperance C69	
Blade Steel.....	CPM 440V
Blade Thickness.....	5/32" 4mm
Diam. Blade Hole.....	9/16" 14.5mm
Edge Type.....	PlainEdge
Weight.....	4.25oz 121g
Length Blade.....	3" 76mm
Length Closed.....	4 1/2" 115mm
Length Cutting Edge.....	3" 77mm, 3 1/8" 79mm
Length Overall.....	7 3/16" 182mm

## Temperance Trainer

FB05TR

For those who would like to practice Martial Blade Craft with a fixed blade we developed the FB05 Temperance Trainer. It is very similar to the "live" knife in size and weight but it has a rounded tip and no edge. Its red handle has all the ergonomics as well as four divots for easy and quick indexing/controlling of the knife.

- Blade steel is AUS-6.
- Handle is red molded FRN with indexing divots.
- No edge makes it safe for MBC workouts.
- No clip but will have a Kydex sheath available.

Lil' Temperance C69

# Pro Culinaire

Do you have a favorite kitchen knife? One you automatically reach for when opening the silverware drawer? Pro Culinaire knives have the ability to unconsciously becoming your best-liked kitchen knife. The Pro Culinaire line is a set of seven chef-grade pieces sold separately. All are made of MBS-26 high carbon stainless steel which demands little maintenance. The handles are made of a slip-resistant polymer called Sermollan. Sermollan has an airy, springy feel that pulls

itself into your palm giving you a tighter grip and elevated control. Serrated models have a unique pattern called SpyderEdge Multi-Level Serrations. In essence, it's two levels of serrated teeth. Like a shark. When one row of teeth wear out, another row is just behind, new, razor-sharp, untouched and raring to go. The blade is thin, semi-flexible and passes effortlessly through food, even frozen items. They're Spyderco's best kept secret.

## Bread Knife K01SBK

Zips through bread with two steps of SpyderEdge serrations. A rounded safety tip protects your hand while cutting. Black Sermollan handle.

Bread Knife K01SBK	
Blade Steel.....MBS-26	Blade Length.....10 3/16" 259mm
Edge Type.....SpyderEdge	Overall Length.....15 3/8" 390mm
Weight.....4.2oz 119	

## Cooks Knife K02PBK

Mid-sized professional cook's knife that has a nice rocking motion on the blade for dicing, cubing and mincing. Available in PlainEdge with a black handle.

Cook's Knife K02PBK	
Blade Steel.....MBS-26	Blade Length.....9 7/16" 239mm
Edge Type.....PlainEdge	Overall Length.....14 9/16" 370mm
Weight.....4.8oz 136g	

## Carving Knife K03SBK

Large ergonomic carving knife that's responsive in your hand. Comes serrated with a black handle.

Carving Knife K03SBK	
Blade Steel.....MBS-26	Blade Length.....8 1/16" 205mm
Edge Type.....SpyderEdge	Overall Length.....13 1/4" 336mm
Weight.....4.0oz 115g	

## Utility Knife K04

Flat-ground, spearpoint style blade that's thin and flexible to pass easily through food. Available in a PlainEdge and SpyderEdge with a black or blue handle.

## Small Utility Knife K05

Smaller version of our K04. It will become your preferred kitchen knife... guaranteed. Available in a PlainEdge or SpyderEdge with a black handle. Also available with a red handle with a SpyderEdge.

Utility Knife K04	
Blade Steel.....MBS-26	Blade Length.....6 1/2" 162mm
Edge Type.....PlainEdge, SpyderEdge	Overall Length.....10 7/8" 275mm
Weight......2oz 57g	

## Santoku K08PBK

The Santoku is a Japanese-style cook's knife, similar in many ways to a butcher's knife. It's colossal enough to chop, dice and de-bone whole fruits, vegetables and roasts. Available with a black handle and PlainEdge.

Small Utility Knife K05	
Blade Steel.....MBS-26	Blade Length.....4 1/2" 116mm
Edge Type.....PlainEdge, SpyderEdge	Overall Length.....8 7/8" 225mm
Weight.....1.5oz 43g	

## Paring Knife K09PBK

The bomb for intricate or artsy food preparation. It is scalpel-like for precision cutting such as pitting, peeling and paring. Comes in PlainEdge with a black handle.

Santoku K08PBK	
Blade Steel.....MBS-26	Blade Length.....6 7/8" 174mm
Edge Type.....PlainEdge	Overall Length.....12 1/8" 307mm
Weight.....5oz 140g	

Paring Knife K09PBK	
Blade Steel.....MBS-26	Blade Length.....2" 51mm
Edge Type.....PlainEdge	Overall Length.....5 1/2" 140mm
Weight......0.7oz 20g	

# Display Tower

## CT01

Displaying your products in their best light increases your sales, no doubt about it! The Spyderco tower display case, parades eight knives in their open position and room for a 204 Sharpmaker in the bottom. Made of clear acrylic, it gives your customer a 360° view of what's inside. The Tower locks by means of an arm-lever locking bar (keys included) allowing you to leave your stock on a countertop without the fear of it "sprouting legs and walking away". An 8 1/2 by 11 inch acrylic page frame snaps to the top for signage.

# Countertop Point of Purchase Display

## POP

Putting our knife in a customer's hand can make the sale. Our new counter top display lets the customer pick up a non-sharpened Spyderco knife, feel it in their hand and check out its features. Made of stainless steel with non-skid feet, it stands 14 inches high, 12 inches wide and comes with a knife attached to a theft-proof chain. Also included is an information card for the knife being displayed.

# Large & Small Knife Stands

## CT02 / CT03

Little jewels. An attractive and original way to display your Spyderco stock. Each gem is multifaceted in a diamond shape, created out of sparkling clear Lucite that catches and reflects prisms of light. The Spyderco logo bug is engraved on the underside. An open knife blade fits into a slot propping the knife up at a 45° angle for visible presentation. Available in two sizes: Small (2 1/2 inch), large (3 1/2 inch).

# The Spyderco Story

For the true and serious Spyderco Knife Knut. The Spyderco Story by Ken Delavigne covers: The history of Spyderco and its arrival onto the knife scene, manufacturing techniques, design development of models, materials and elements, business philosophies and more than you can imagine. Published by Paladin Press, it's 302 pages chock full of information and photos.

# Glossary

# Glossary

**ABS:** A thermoplastic polymer used for its' high impact strength.

**Almite:** A coating used on aluminum handles similar to anodizing. Resistant to scratching and marring, it can also be tinted to any color for visual appeal.

**Alumina Ceramic:** The compound used for Spyderco sharpening stones. It is a ceramic-bonding agent mixed with alumina particles (synthetic sapphires), shaped, then kiln fired at temperatures in excess of 3000 degrees F.

**Ambidextrous:** Using both hands with equal ease. Pertaining to knives, it is a knife that is not solely designed for a left-or right-handed person but can be used with equal ease by both hands.

**Anodized Aluminum:** Subjecting aluminum to electrolytic action which coats the aluminum with a protective and decorative film.

**Batch:** Refers to a knife model that is made in small numbers. A Spyderco batch is 1200 pieces and if the model is received well another batch or more will be produced.

**Bi-Directional Texturing:** A texture molded into a FRN handle, which is a series of graduating, sized forward and backward steps that radiate outward from the center of the handle. This texture provides resistance to slipping and sliding when gripped in the hand.

**Carbon Fiber:** Graphite fibers (the size of a human hair) are woven together and fused in epoxy resin. It's lightweight, three-dimensional in appearance and is a superior (and expensive) handle material.

**Choil:** A cut out, molded or formed area where the handle and blade meet which positions/guards the index finger while gripping the opened knife.

**CLIPIT:** Spyderco's term for their line of folding knives which feature a pocket clip. A CLIPIT fan is often called a CLIPITEER. Okay we know it's corny, but true.

**Clip-Point Blade:** A blade, ground on the top (spine) in an angled or sweeping line downward. The underside (where the sharpened edge is) is ground upward. The two angles meet at the tip and where the angles meet determines the depth of the blade's belly.

**Cobra Hood:** A machined flange of steel positioned over the Spyderco round opening hole on the spine of the blade which directs/positions your thumb over the hole for quickly opening the knife blade. See Spyderco C71 Salsa.

**ComboEdge:** Blade that is partially serrated, partially plainedge.

**Compression Lock:** Locking system located on the top of the blade spine which functions by having a liner deposit a section of metal between the stop pin (anvil pin) and the blade tang. The section of metal is compressed making an incredibly strong locking mechanism.

**David Boye Dent:** Custom knifemaker David Boye removed a small arc or dent of metal from the top locks of his knives. This removed piece lessened the possibility of gripping the handle hard enough to depress the lock and accidentally unlock the blade while using the knife.

**Detent:** a minute divot or dimple machined into the blade tang. A ball bearing drops into the detent hole when the knife is in the closed position, holding the knife blade closed inside the handle.

**ELU:** Acronym for "end-line user", the consumer who uses Spyderco knives and sharpeners.

**Embellishment:** Term used to describe personalized engraving or additional ornamentation added to a knife after it is manufactured.

**Ergonomics:** The applied science of equipment design intended to maximize productivity by reducing operator fatigue, safety and discomfort. Knives which are designed to be comfortable and less fatiguing to use are labeled "ergonomic."

**Fiberglass Reinforced Nylon Resin (FRN) :** A nylon polymer mixed with glass fiber that is then injected into a mold for making lightweight knife handles.

**G-10:** Handle material made of epoxy filled with woven glass fiber that is impervious to changes in temperature and can be tinted into many colors.

**Hamaguri Grind:** (also called Appleseed Grind or Moran Grind): is a convex grind.

**Hawkbill Blade:** Blade shaped in a sharply curved hook like the talon of a raptor. The inside edge of the blade is

sharpened and works particularly well for commercial fishermen who reach out and pull toward them while cutting line, webbing and netting.

**Indexing:** "Locating" mark, also used for controlled rotation of the open knife, while gripped in the palm, from one hand-hold to another, e.g., rotating from a forward grip to a reverse grip.

**Kick:** The unsharpened portion along the underside of the knife blade where the edge begins. Keeps the blade "kicked out" so the edge does not hit the back spacer.

**Kinetic Opener:** A horn or protuberance on the top portion of a knife blade by which the blade may be opened when leveraged against something solid, i.e. an opponent's body. Similar to the opening devices found on straight razors.

**Kraton:** A rubbery thermoplastic polymer used as a flexible inlay on knife handles for enhanced grip.

**Kydex:** A thin thermoplastic commonly used for firearm holsters and knife sheaths. It is flexible, thin, resistant to sweat, chemicals, oils and solvents. It is shaped by heat and retains its' set form.

**MBC:** An acronym for Martial Blade Craft. MBC is the practice of combative arts for self-protection, physical conditioning and control and coordination of the body. MBC's ultimate goal is to train professionals to "stop the bad guy from hurting innocents." Spyderco's founder believes MBC will find a presence in the Olympics among Judo and fencing.

**Micarta:** A composite of linen or paper fabric in an epoxy resin. It is incredibly lightweight, durable and visually appealing. It can be bead blasted or polished, changing its appearance.

**Mother of Pearl:** The colored opaline inside of a clamshell. This translucent layer is affixed by Spyderco to G-10 for use in embellishing knife handles.

**Phantom Lock:** A pressure release locking system used on the Spyderco MeerKat, model C64. The lock is released by positioning your thumb on the butt end of the handle over the Spyderco bug, and two fingers on the back side of the handle then scissoring the two sides in opposite directions.

**PlainEdge:** A sharpened knife blade with no serrations or teeth. Sometimes called a smooth blade.

**Reverse "S" Blade:** Blade shape resembling a backward S with the tip curving downward. The deep belly (thickest part of the blade) curves in the same direction as the tip. See C12 Civilian page 18.

**Scale:** A knife handle made of scales or slabs of material that are riveted, screwed or bonded together.

**Sermollan:** A rubberized plastic used on kitchen knife handles that offers a secure grip and resistance to bacteria.

**Sheepfoot Blade:** A blade with a round, blunt tip that has no fine point. The design inhibits accidental stabbing while working in emergency situations, around livestock and inflatable boats.

**Sprint Run:** A limited, one time only, production of a knife design/model. Production numbers are less than 1000 pieces.

**SpyderEdge:** Spyderco's two-step serration pattern of one large and two small serrations. This pattern actually increases the cutting edge by 10%.

**Spyderco Trademark Round Hole™:** Round hold located in the knife blade used for one-hand opening and closing of a knife blade.

**Tang:** The portion of the blade where it connects to the handle.

**Tek-Lok:** Detachable polymer clip mounted onto some of Spyderco's Kydex sheaths which can be situated to carry the knife in five different carry positions: vertical, inverted, cross-draw, small of back or horizontal position.

**Titanium:** A non-ferrous metal with high tensile strength is lightweight and resistant to corrosion. Often used for handle material it can be colored through an electronic process called 'bluing'.

**Trainer:** A red-handled non-sharpened knife used for training and practice purposes.

**Volcano Grip:** Our trademarked name for the waffle texture found in our FRN handled lightweight knives. The continuous pattern of small squares offer better hand grip while cutting.

# Edge-U-Cation

Spyderco knives are an investment. Knives are designed to perform one particular function, that is cutting. With that in mind Spyderco uses high-carbon steel exclusively. High-carbon premium steels provide superior edge retention but can rust if not correctly cared for (rust is rarely the result of a manufacturing defect). Rust may form when your knife is used in a salt water environment or exposed to moisture in general. If surface rust appears, buff the steel with a metal polishing compound before the steel becomes pitted. Thoroughly rinse salt water off with fresh water, dry your knife completely (inside and out) and apply a light coat of oil or silicone to all steel parts. To ensure safe operation regularly inspect the interior of the knife for pocket lint and grime. Clean both the well of the lock and inside of the handle often using a toothpick, hot water and a mild soap or detergent. Rinse thoroughly, dry the knife inside and out and lubricate all steel components with oil or silicone. A couple drops of lubricant at the locking and pivot points will ensure smooth action.

## Always Keep your Knife Sharpened

A sharp knife makes cutting easier and safer. The longer a knife goes without edge maintenance the more difficult sharpening becomes. You can easily uphold your factory edge (plain and serrated) at home with Spyderco's Tri-Angle Sharpmaker or ProFile set. You can also return your knife to Spyderco's corporate headquarters for complimentary sharpening for as long as you own it. The charges involved in shipping the knife to us are the responsibility of the owner. If we determine that your edge is irreparable or damaged beyond our repair abilities our Warranty and Repair Department will contact you.

## Our Warranty

If you have not seen our warranty policy for awhile or would just like an update.....read on. We make high-performance quality products. If you have problems with any Spyderco product, we would like to hear about it. Your input and questions are important to us. Knives are designed as cutting tools. Use of your knife for any purpose other than cutting is considered abuse. As with any tool, you may exploit their value prematurely or they may fail to perform if not used or cared for properly. Spyderco warrants that all of our products are free from defects in material and workmanship. Spyderco's warranty does not cover damage caused by abuse, misuse, improper handling, alteration, accident, neglect, disassembly, or improper sharpening. If a knife fails to function as it was designed we will examine its condition upon its return to us, identify why it failed and respond in an appropriate manner. If we determine that there

is a defect in the manufacture or materials we will gladly repair, or replace that product with the same model or one of equal value. If the problem is determined not to be caused by defects in manufacture or materials we will inform you of the cost for repair. Upon agreement and payment we will perform the repair. If we are unable to improve the condition of the knife, we will return it to you with the recommendation that it be retired from use. Please direct all inquires regarding warranties to our mailing address, toll free number, fax, email or URL. Packages directed to Spyderco should be sent UPS or registered mail (for tracking purposes should your knife fail to arrive at our offices). Please include your complete name, UPS deliverable street address (no P.O. boxes please), daytime phone number and a description of the concern. Outbound warranty shipments from Spyderco will be returned to the dealer or retail customer as directed. All costs associated with the shipment of the product are the responsibility of the customer.
